

SHOOTERS' OPTOMETRIST

Dear Fellow Shooters:

We shooters have special visual needs to excel at our sport. I am familiar with those needs and I know how to address them, since I too am a shooter.

I work with shotgun, rifle, and handgun. I know optics, iron sights, red dot, and laser. I have also worked with air rifle and archers. In handgun I personally shoot PPC and IDPA.

I have seen shooters from every club in the area and I believe I have helped them all. If you would like to improve your vision for any kind of shooting, give me a call.

In our office we carry shooters frames from Decot, Ranger (Randolph Engineering), and Rudy Project.

Make your appointment the last one of the day with me and bring any handgun, rifle, pistol or bow. Leave it in your car until I tell you to go and get them. The office staff will be gone, we'll lock the doors, set up targets and get to work. Naturally, **no live ammunition**.

Safe Shooting,

Dr. Richard J. St. Louis
4486 W. Walton Blvd.
Waterford, Mi. 48329
